

"Migrating Birds and the Spread of Diseases"

**Graham Appleton,
British Trust for Ornithology**

Interest in the spread of avian influenza has given new impetus to the study of migration. Graham will show how ringing data and survey information can contribute to bird flu early warning schemes and highlight other recent research into bird diseases.

HILLTOP FARM, WELBOURN, LINCOLNSHIRE LN5 0QH

SATURDAY 13 JUNE 2009 10.30-1.30

This is an outdoor social event with an illustrated talk taking place in the barn. There will be time for wandering around the conservation area before the talk and ringing will take place earlier if conditions permit. Booking is necessary.

Morning coffee and Lunch included £10

***Organised by the Institute of Biology (East Midlands Branch)
British Trust for Ornithology (Lincolnshire and Notts)***
