

County Rarities 2011

Species considered rare at county level are dealt with by the Lincolnshire Bird Records Committee. The committee currently comprises John Badley, Graham Catley, John Clarkson, Paul French, Wayne Gillatt, Phil Hyde, and Andy Sims. The chairman of the 2010-11 LBRC is John Clarkson and Roy Harvey is secretary.

Please send all details and descriptions of any LRBC species to Roy Harvey; roy.harvey100@btinternet.com.

All records of LRBC species should be submitted as soon as possible after the sighting and not left until the end of each year. County rarities accepted by the LBRC will be published in the report together with the initials of the finder/identifier.

The verification of the data that appears in the annual report is essential to the production of an accurate and meaningful report. A systematic approach to the verification of ALL rare bird records, no matter who has reported them, prior to the production of the annual report is required before they are published.

From time to time the LBRC will reserve the right to seek additional details of other records deemed exceptional by virtue of, for example, date, location, or number. The list of birds considered by this committee and the level of proof needed is subject to regular review as, indeed, is the membership of the LBRC.

Species	Records requested/descriptions required (to 31/12/08)	
Little Bittern	All records BBRC	BBRC
Squacco Heron	All records BBRC	BBRC
Black Stork	All records BBRC	BBRC
